***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01-16-2007 has been entered.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-23 and 37-53.

Claim 25, change the status identifier from "(Withdrawn)" to "(Original)".

Claim 27, change the status identifier from "(Withdrawn)" to "(Original)".

Claim 30, change the status identifier from "(Withdrawn)" to "(Original)".

Claim 31, change the status identifier from "(Withdrawn)" to "(Original)".

Claim 35, change the status identifier from "(Withdrawn)" to "(Original)".

Claim 54, change the status identifier from "(Withdrawn)" to "(Currently Amended)".

Claim 54, line 3, change "claim 49" to "claim 26".

Claim 55, change the status identifier from "(Withdrawn)" to "(Original)".

Claim 56, change the status identifier from "(Withdrawn)" to "(Original)".

The following is an examiner's statement of reasons for allowance: Claims 24, 26, 28, and 57 are amended to be commensurate in scope with the showing of unexpected results in the Oxman Declaration filed 11-15-2006. The comparative data in the Declaration reported in Table I on page 3 is evidence that depth of cure is significantly improved when the combination of iodonium salt, camphorquinone and 2-ethyl-9,10-dimethoxy anthracene is employed in the tested filled epoxy resin composition. The tested compositions in Table I comprise a silicon containing epoxy and a substantial amount of silica as filler. The showing of unexpected results is considered to overcome the rejection of claims as being obvious over the cited prior art wherein the visible light sensitizer is an alpha diketone, such as camphorquinone.

Method claim 54 has been amended to depend from composition claim 26 and method claims 54-56 have been rejoined with the allowed compositions.

Claims 25, 27, 30 and 31, which were withdrawn as being drawn to nonelected species of the elected invention have been rejoined with the allowed claims.

Claims 1-23 and 37-53, which were withdrawn as being drawn to non-elected species of the elected invention, have been canceled without prejudice because the scope of these claims is broader than the scope of the allowed claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
